EXAMINER'S COMMENT and REASONS for ALLOWANCE

1. The drawings received on 12/8/2005 approved.

REASONS for ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

In independent claims 1 and 10, directed towards a processing system and a method for updating a firmware stored in a non-volatile memory (NVM) of a processing system, the following features taken in combination with the remaining limitations of the independent claims are not found in and or are not obvious in view of the prior art of record,

Claim 1,

"wherein when the NVM control interface updates a current piece of data stored in the NVM, the NVM control interface is for first reading a previous piece of data being already updated in the NVM prior to the current piece of data and transmits the previous piece of data to the computer for comparison with original data that was previously stored in the NVM, if the previous piece of data and the original data are identical, the NVM control interface updates the current piece of data";

Claim 10,

"during the update of the current piece of data, reading a previous piece of data being stored in the NVM prior to the current piece of data and transmitting the previous piece of data to the computer for comparison with the original data that was previously stored in the NVM, if the previous piece of data and the original data are identical, then updating the current piece of data utilizing the NVM control interface".

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
